Polyfx[®] EXTRA HEAVY DUTY KNITTED SHADECLOTH

Polyfx[®] shadesails are ideal around swimming pools, beach entertainment and barbecue facilities, outdoor leisure and picnic areas. Other applications include, playgrounds, preschools, secondary schools, camping grounds, hotels, motels and holiday resorts.

Shadesails made from Polyfx[®] also offer a striking alternative to flat roof timber pergolas and can be designed to accentuate any location, whether it be a home, garden or commercial establishment.

It is recommended that these modular free standing

structures or shadesails be designed to hold the shadecloth under firm tension.

Polyfx[®] provides maximum people protection against the sun's heat and strong ultraviolet rays and utilizes the best UV stabilizers from Ciba Speciality Products. It also provides good protection against wind, rain and hail.

Polyfx[®] has been heat set, making it more stable and easier to cut and sew when fabricating a shadesail. It also has less shrinkage while still retaining its strength and very high UV protection.
